MonoPolyU

Developer Manual
The Monopoly Game

Authored by:
- Dominicus Dylan HARYOTO
- Haoran BAI
- Tao FU
- Weichen NING

Prerequisite

1. JDK Version: 17 and above
2. Build Tool: IntelliJ IDEA (**recommended**) or Command-Line

Project Buildup

1. CMD Version
   a. Open the CMD from the project directory

   ```
   D:\The-Monopoly-Game-master>
   ```

   b. Run the compilation command "javac -d out src/*.java"

   ```
   D:\The-Monopoly-Game-master>javac -d out src/*.java
   ```

2. IntelliJ IDEA
   a. The terminal in IntelliJ IDEA can also be used the same as CMD.
   b. IntelliJ supports compiling with running together by right-clicking the Java file and selecting the run option.

Project Debugging

1. CMD is not recommended for debugging, which left debugging on IntelliJ.
2. Right-click the Java file and select the debugging option to enter debugging mode.
